BR-4XD

ITEM NO.	DESCRIPTION	QTY.
1	Mount Base	2
2	Clamp	2
3	Clamp Screw	4
4	Hex Nut	4
5	Lag Screw	4

Step 2: Attaching the main support to the mounting surface

Step 3: Attaching the antenna mast to the main supports

Step 1

Before starting, lay out all parts to your mount and match them to the parts list provided. Verify that you have all your parts before attempting to assemble the mount. **Note: It is highly recommended that the installation of the mount be done by a professional.**

Step 2

Mark the wall or desired mounting surface in preparation of installation of the main support. Pre-drill if necessary and mount the main support to desired surface. **Note: Place the other support as far away from the first support as possible to give the antenna mast more stability.**

Warning: Please verify that your mounting surface will support the combined weight of your mount, mounting hardware, and antenna mast. Also verify that the mounting surface is safe to drill through. If in doubt, please contact a professional installer.

Step 3

Place the antenna mast into the cup on the main support. Place clamp plate on the opposite side of the antenna mast and use the carriage screw and hex nuts to tighten down the clamp plate onto the antenna mast clamping it in place.

Please verify that all nuts and screws are securely tightened.

Enjoy Your Mount!

WARNING: The installer must verify the installation meets all applicable codes and survival requirements. Video Mount Products will not be held liable for the improper use or installation of its products.
